

SKILLS SUMMARY

- Languages & Frameworks:** JavaScript (ES6+), TypeScript, C/C++, SQL; Angular 16+, React, Node.js, Express.js.
- Frontend & UI:** HTML5, CSS3, SCSS, Tailwind CSS, Angular Material, Bootstrap, CapacitorJS.
- Cloud & DevOps:** AWS (S3, EC2, Lambda, RDS), GCP (Compute Engine, Cloud SQL), Firebase, Docker, Vercel.
- Tools & Testing:** Figma, Git (GitHub/GitLab), Postman, Webpack, Vite, Nx, Jasmine, Karma.
- Integrations:** Stripe, Razorpay, PayPal, Google Maps, WhatsApp Business API, OAuth, Gmail REST API, SMTP.
- Soft Skills:** Agile/Scrum, Technical Writing, Mentoring, Cross-functional Collaboration.

WORK EXPERIENCE

SOFTWARE DEVELOPER | LOGICASANA PVT. LTD

JUNE 2024 - PRESENT

- Lead Frontend Architecture:** Architected the client-side of [Lookzup.com](#) using Angular 16+ and Capacitor JS, delivering a unified web and mobile experience (Android/iOS) for a complex wellness ERP and marketplace.
- Performance Optimization:** Improved initial load times by 30% through Lazy Loading, OnPush Change Detection, and optimized RxJS streams, ensuring a seamless UX for real-time booking and business analytics.
- Scalable UI System:** Developed a library of 20+ reusable UI components using Angular Material and Tailwind CSS, reducing frontend development time for new features by approximately 25%.
- Feature Engineering:** Engineered a multi-step booking engine and QR-based attendance system, streamlining the "time-to-book" and reducing manual check-in overhead for service providers.
- Fintech & Data Integration:** Integrated secure payment gateways and built real-time data visualization dashboards for sales and inventory, utilizing Reactive Forms to handle complex business data entry.

SOLUTION ENGINEER | COLORBRACKET TECHNOLOGIES LLP

JUNE 2022 - MAY 2024

- Medical Tourism Platform:** Developed a global [healthcare platform](#) using Angular and Node.js, implementing complex lead-management workflows and a secure patient-doctor communication portal to facilitate international medical travel.
- Dripple Platform:** Architected the frontend for a comprehensive multi-utility web+app encompassing E-commerce, Food Delivery, and Ride-Hailing; engineered real-time tracking, multi-vendor storefronts, and dynamic booking systems for a seamless user experience across diverse service categories

PROJECTS

[Xpensio](#): Personal Finance SaaS | *MERN Stack, OAuth, Tailwind CSS*

- Architected a full-stack budgeting tool featuring secure OTP authentication and RESTful APIs for real-time financial data logging and processing. Leveraged Gemini API to implement predictive analytics for automated spending insights.
- Designed an automated data aggregation engine in Node.js to generate monthly spending insights and visual analytics.

VantaCrypt: High-Performance File Encryption SDK | *C++, STL, Emscripten (Wasm), TypeScript*

- Developed a low-level file encryption engine using custom byte-transformation pipelines, chunk-based streaming encryption, and 256-bit key scheduling for secure large-file processing.
- Engineered a WebAssembly (Wasm) runtime to port high-performance C++ logic into browser and Node.js environments, enabling client-side encryption with near-native execution speeds.

EDUCATION

Dibrugarh University

Bachelor of Computer Applications: SGPA: 8.77

Assam, India

2019-2022
